Date	Day Temp (F)	Day Humidity	Basking Temp	Night Temp (F)	Night Humidity	Behaviors to Note	Suppliment	Actually Ate	Poop Notes
2/3	72	50	85	64	91	Eye looks normal again, no irregular behaviors	Calcium	4 dubia	
2/4	70	56	79	66	79	Typical behaviors, hiding under new potted plant	D3	4 dubia	
2/5	72	51	80	68	88	Moved to new enclosure today, seemed to handle it relatively well, did puff at me to move her from temporary enclosure but calmed once I brought bugs to encourage her to move. Wandering on sticks in new enclosure			Found a poop on temp enclosure floor behind plant. Urate was very large with an orange tip, poop looked like it was semi hydrated (not good tell due to it not being fresh)
2/6	72	57	85	66	82	Climbing on structure sticks to get closer to heat lamp, added another vertical stick closer to get her more heat options.	Calcium	3 dubia	
2/7	72	53	85	64	94	Normal behaviors, ate treats out of mine and Valee's hand		4 mealworms	
2/8	70	56	81	64	83	Up early and basking. Ate quickly. Hissed as she ate. 11:59 still basking	Calcium	4 dubia	
2/9	70	64	86	63	88	Put middle plant in enclosure for more coverage, was irritated but fine. Typical behaviors			Runny poop (photo taken), large white urate
2/10	72	54	81	61	92	Displaying dark colors later in the day	Calcium	4 dubia, 1 silk moth	
2/11	72	60	81	63	91	Tried to fit drainage tray, showed some signs of stress	Multi-Vitamin	3 dubia	Liquid poop, hydrated urate
2/12	72	54	85	64	78	Normal behaviors		1 silk moth	
2/13	72	54	84	63	90	Normal behaviors	Calcium	1 silk moth, 4 BSFL
